ABOUT US

UTA Manpower Service is a licensed recruitment company under the Sri Lankan Bureau of Foreign Employment (License no: 2179) we are a proud winning recruitment brand for the SLBFE Five Star Award 2022.

We are in the field offering recruiting services to our clients since 2008

UTA MANPOWER SERVICE
MANPOWER RECRUITMENT CONSULTANT & TICKETING

Our Value

Mission

Our Vision is to be the leading manpower recruiting agency in placing Sri Lankan talents to the corporate world.

Vision

Our Mission is to provide top-notch professional manpower recruiting services as a recruitment agency in Sri Lanka to our clients and to find the best-fit employment for our job-seekers.

MD's Message

Sri Lanka is a Country with a population of 20 million, known as the Pearl of the Indian Ocean with multilingual community, the educational standards are very high and recognized World over academically and professionally. Apart from the education, the standard of skilled and workmanship are very high and Sri Lanka workers are friendly and adapt very fast to the working environment.

It is a profound pleasure to introduce ourselves as a Government approved foreign employment agency bearing license No:2197 in Sri Lanka issued by the Ministry of Labour and the Sri Lanka Bureau of Foreign Employment. We are engaged in the selection and placement of personnel for foreign employment for last 35 years.

The potential requirement of organizational needs in the Middle East Countries, Europe, Far East and other parts of the World for manpower resources are now being recruited from Asian Countries like Pakistan, India, Philippines, Nepal, Bangladesh, Vietnam, Thailand, etc., and specially from Sri Lanka for their skilled and semi skilled workmanship and high standard of educational background obtained from Government and Private Institutions in their respective fields.

Reason behind any organization to consider in recruiting manpower from Sri Lanka, that also from a well experienced company known as "UTA Manpower Services" with 35 years of experience is another source of a potential qualification to look for human resources.

Once, we are provided with an opportunity, to be of service to your organization, no doubt, we will serve you to the satisfaction of the management, where we will be repeatedly contacted for future requirements. All job requirements are handled with personalized services for job satisfaction of the end user and to the satisfaction of the entire management of the valuable clientele.

UK. THANZEEL
Managing Director

01. Addressing Challenges of Migration Labour Administration Process in Sri Lanka

Introduction

Labour migration plays a significant role in Sri Lanka's economy, with thousands of workers migrating annually, especially to the Middle East. As a private recruitment agency, we are deeply involved in managing the processes related to overseas employment including recruitment, documentation, pre-departure training, and coordination with government institutions. Despite improvements in recent years, several challenges persist within the labour migration administration process, which affect both our operations and the welfare of migrant workers.

Challenge 1: Delays in Documentation and Approvals :

- One of the most common challenges is the delay in processing and approving necessary documents such as passports, visas, and approvals from the Sri Lanka Bureau of Foreign Employment (SLBFE). These delays can result in missed employment opportunities and dissatisfaction among clients.

Suggested Solution:

- Implementing a fully digitized and centralized documentation system integrated with SLBFE can streamline the approval process. A tracking system for agencies and applicants would help in transparency and efficiency. Our agency could also assign dedicated staff to monitor each case, ensuring proactive follow-up.

Challenge 2: Lack of Coordination Among Stakeholders :

- Coordination between recruitment agencies, training centers, foreign embassies, and government bodies is often weak, leading to miscommunication and delays in final deployment.

Suggested Solution:

- Creating a stakeholder coordination platform (possibly a mobile app or web portal) where all parties can update progress and requirements in real-time would bridge communication gaps. This is a strategy we learned from the course on inter-agency collaboration and workflow integration.

Challenge 3: Inadequate Pre-departure Training :

- Many migrant workers are not adequately prepared for the cultural, legal, and practical realities of their destination countries, increasing the risk of contract violations and disputes.

Suggested Solution:

- Revamp pre-departure orientation programs with a strong focus on cultural adaptation, legal rights, financial literacy, and mental health support. Using digital tools such as videos, apps, and e-learning platforms can make training more engaging and accessible.

Challenge 4: Exploitation by Sub-agents and Brokers :

- Despite regulations, many job seekers continue to rely on informal sub-agents who charge high fees or provide false information, damaging the reputation of licensed agencies.

Suggested Solution:

- We propose creating a national registry of licensed sub-agents, monitored by SLBFE and accessible to the public. Furthermore, our agency is working on a mobile platform where job seekers can verify agent details and report misconduct anonymously.

Challenge 5: Limited Use of Technology in Agency Operations :

- Many processes are still manual — from filing applications to updating job seeker profiles. This increases operational costs, errors, and turnaround time.

Suggested Solution :

- Adopt a cloud-based recruitment management system that integrates CRM (Customer Relationship Management), application tracking, and reporting. The course emphasized digital transformation in administration, which we are now piloting at our agency with positive initial results.

Conclusion :

- Addressing the above challenges is vital not only for the betterment of our organization but also for ensuring safe and efficient migration for Sri Lankan workers. By adopting digital tools, strengthening inter-agency coordination, improving training, and enhancing transparency, we can elevate the standards of labour migration administration in Sri Lanka.

02. Project proposal to Enhance Productivity and Business Performance at UTA Manpower Service

Executive Summary:

This proposal outlines a comprehensive plan to improve productivity and business performance at UTA Manpower Service by implementing digital transformation initiatives, enhancing recruitment processes, and improving candidate experience. Drawing from the knowledge gained in the "General Management & Labour Migration" certificate course, this project focuses on leveraging technology, optimizing operations, and strengthening client relationships to position UTA as a market leader in Sri Lanka's foreign employment sector.

1.Introduction:

- UTA Manpower Service has been a trusted government-approved foreign employment agency for 35 years, with recognition including the SLBFE Five Star Award in 2022. To maintain our competitive edge and address evolving market demands, we propose strategic improvements to our operations that will enhance efficiency, service quality, and overall business performance.

2.Project Objectives:

- Reduce average recruitment cycle time by 30% within 6 months
- Increase candidate placement success rate by 25% within one year
- Improve client satisfaction scores by 20% through enhanced service delivery
- Digitize 80% of documentation processes within 9 months
- Enhance staff productivity through technology adoption and training

3.Proposed Key Initiatives:

3.1 Digital Transformation of Recruitment Processes

Current Challenge: Manual processes in candidate screening, documentation, and client communication lead to inefficiencies and delays.

Proposed Solution:

Implement a comprehensive Recruitment Management System (RMS) with:

- Automated candidate screening and matching algorithms
- Digital document management and verification
- Client portal for real-time updates
- Mobile app for candidate engagement

Expected Benefits:

- 40% reduction in administrative workload
- Faster response times to client requirements
- Improved accuracy in candidate matching
- Enhanced data security and compliance

3.2 Enhanced Candidate Training and Preparation Program

Current Challenge: Some candidates face challenges adapting to foreign work environments, leading to early returns.

Proposed Solution:

Develop a comprehensive pre-departure training program including:

- Language and cultural orientation (specific to destination countries)
- Workplace etiquette and expectations
- Basic financial literacy for migrant workers
- Rights and responsibilities under foreign employment contracts

Expected Benefits:

- Reduced early return rates by 30%
- Higher client satisfaction with placed workers
- Enhanced reputation for quality placements
- Better long-term outcomes for migrant workers

3.3 Client Relationship Management System

Current Challenge: Limited systematic approach to managing client relationships and repeat business.

Proposed Solution:

Implement a CRM system specifically configured for manpower recruitment:

- Client requirement tracking
- Performance analytics on placed workers
- Automated follow-up and feedback collection
- Business intelligence for identifying new opportunities

Expected Benefits:

- 25% increase in repeat business
- Better understanding of client needs
- More proactive service delivery
- Data-driven decision making

3.4 Digital Marketing and Brand Enhancement

Current Challenge: Limited digital presence affects ability to attract both candidates and international clients.

Proposed Solution:

Comprehensive digital marketing strategy including:

- Professional website redesign with multilingual support
- Targeted social media campaigns (LinkedIn, Facebook)
- Content marketing showcasing success stories
- Search engine optimization for international visibility
- Virtual recruitment fairs and interviews

Expected Benefits:

- 40% increase in qualified candidate applications
- Expanded client base in new markets
- Stronger brand positioning as industry leader
- Reduced dependency on traditional recruitment channels

3.5 Staff Training and Capacity Building

Current Challenge: Need to enhance staff capabilities to leverage new technologies and changing market demands.

Proposed Solution:

Structured training program covering:

- Digital tools and systems training
- Advanced recruitment techniques
- Cross-cultural communication skills
- Customer service excellence
- Data privacy and ethical recruitment practices

Expected Benefits:

- Higher staff productivity and job satisfaction
- Consistent service quality standards
- Better adaptation to technological changes
- Improved ability to handle complex recruitment needs

4. Implementation Plan

Phase 1: Foundation (Months 1-3)

- Conduct needs assessment and system selection
- Develop project team and assign responsibilities
- Secure necessary approvals and budget allocation
- Begin staff training on digital literacy

Phase 2: System Implementation (Months 4-6)

- Deploy Recruitment Management System
- Implement CRM platform
- Launch initial digital marketing campaigns
- Develop pre-departure training curriculum

Phase 3: Roll-out and Optimization (Months 7-12)

- Full implementation of all systems
- Staff training on new processes
- Continuous improvement based on feedback
- Performance measurement and adjustments

5. Budget Estimate

Item	Estimated Cost (LKR)
Recruitment management System	100,000
CRM Implementation	150,000
Digital Marketing	100,000
Training Program development	200,000
Staff Training	40,000
Contingency	100,000
Total	690,000

6. Expected Outcomes and Evaluation

Key performance indicators will be tracked monthly to measure success:

- Reduction in recruitment cycle time
- Increase in placement success rate
- Client satisfaction scores
- Candidate satisfaction metrics
- Staff productivity measures
- Business growth indicators

Regular review meetings will be conducted to assess progress and make necessary adjustments to the implementation plan.

7. Conclusion

This comprehensive productivity enhancement plan will position UTA Manpower Service for sustained growth in an increasingly competitive foreign employment market. By leveraging technology, optimizing processes, and investing in our people, we will enhance our service quality, operational efficiency, and market position. The proposed initiatives align with our vision to be the leading manpower recruiting agency for placing Sri Lankan talents in the global corporate world while maintaining our commitment to ethical recruitment practices and excellent service.

We recommend beginning implementation immediately to capitalize on current market opportunities and establish UTA as the most technologically advanced and efficient manpower service provider in Sri Lanka.
