

Professional Certificate in General Management & Labour Migration

FULL REPORT SUBMISSION

Title: Enhancing Labour Migration Administration and Organizational Productivity in Sri Lanka

Case Organization: UTA Manpower Service

Submission Date: April 2025

PART I: Addressing Challenges of Migration Labour Administration Process in Sri Lanka

Labour migration remains one of the most significant contributors to Sri Lanka's national economy. Foreign remittances form a major portion of foreign exchange earnings, particularly from workers employed in the Middle East, Europe, and Asia. Private recruitment agencies act as intermediaries between foreign employers and Sri Lankan job seekers. Their responsibilities include candidate sourcing, documentation, medical clearance coordination, training facilitation, and compliance with Sri Lanka Bureau of Foreign Employment (SLBFE) regulations.

Despite regulatory reforms, several operational and administrative challenges persist within the labour migration system.

1. Delays in Documentation and Approvals:

Processing of passports, visas, medical reports, and SLBFE approvals is often slow due to bureaucratic bottlenecks and manual workflows. These delays negatively affect deployment timelines and employer trust.

Recommendation:

Introduce an integrated digital documentation platform linked with SLBFE, immigration authorities, and foreign embassies. Agencies should also assign case managers to ensure real-time monitoring.

2. Weak Stakeholder Coordination:

Lack of structured communication among agencies, embassies, training centers, and regulators causes misalignment in recruitment processes.

Recommendation:

Develop a centralized stakeholder communication portal with workflow integration and status tracking.

3. Inadequate Pre-Departure Preparation:

Some migrant workers lack awareness of cultural norms, legal protections, and financial planning.

Recommendation:

Modernize training programs by incorporating cultural orientation, digital learning modules, financial literacy education, and mental health awareness.

4. Exploitation by Informal Sub-Agents:

Unregistered brokers often mislead job seekers and charge excessive fees, damaging ethical standards.

Recommendation:

Establish a public national registry of licensed sub-agents and implement reporting mechanisms for job seekers to ensure transparency and accountability.

5. Limited Digital Adoption:

Manual paperwork increases administrative workload and risk of errors.

Recommendation:

Adopt cloud-based Recruitment Management Systems (RMS) integrated with CRM and compliance monitoring tools.

Addressing these challenges through technology, transparency, and structured management reforms

will significantly enhance Sri Lanka's labour migration governance framework.

PART II: Comprehensive Project Proposal to Enhance Productivity at UTA Manpower Service

Executive Summary:

This report proposes a structured productivity enhancement framework for UTA Manpower Service. By leveraging digital transformation, process optimization, and staff capacity building, the organization can strengthen operational efficiency and maintain competitive advantage.

Organizational Background:

UTA Manpower Service is a government-approved recruitment agency with 35 years of experience and recognition such as the SLBFE Five Star Award. To adapt to global market demands, strategic modernization is essential.

Project Objectives:

- Reduce recruitment cycle time by 30% within six months.
- Increase placement success rate by 25% within one year.
- Improve client satisfaction by 20%.
- Digitize 80% of documentation processes.
- Strengthen employee productivity through skill development.

Strategic Initiatives:

1. Digital Recruitment Management System (RMS):

Automated candidate screening, digital document verification, and real-time client dashboards.
Expected Impact: 40% reduction in administrative workload and improved deployment speed.

2. Customer Relationship Management (CRM):

Structured client tracking, performance analytics, and feedback automation.
Expected Impact: 25% increase in repeat business and improved service quality.

3. Enhanced Pre-Departure Training Model:

Language orientation, workplace ethics training, financial literacy, and legal awareness.
Expected Impact: Reduced early returns and stronger employer satisfaction.

4. Digital Marketing Strategy:

Website modernization, SEO, social media campaigns, and virtual recruitment events.
Expected Impact: Expanded international visibility and increased candidate applications.

5. Staff Capacity Development:

Continuous training in digital systems, ethical recruitment, and cross-cultural communication.
Expected Impact: Higher productivity, job satisfaction, and service consistency.

Implementation Plan:

Phase 1 (Months 1–3): Needs assessment, budgeting, system selection.

Phase 2 (Months 4–6): RMS and CRM deployment, marketing rollout.

Phase 3 (Months 7–12): Full system integration, evaluation, optimization.

Budget Estimate:

Total estimated investment: LKR 690,000 covering system implementation, marketing, training development, and contingency allocation.

Performance Measurement:

KPIs include recruitment cycle time, placement rate, client satisfaction index,

staff productivity metrics, and revenue growth indicators.

Conclusion:

By integrating digital transformation with ethical recruitment principles, UTA Manpower Service can position itself as a technologically advanced and socially responsible leader in Sri Lanka's foreign employment industry.
