

Professional Certificate in General Management & Labour Migration

Research Paper Submission

Title: Enhancing Labour Migration Administration and Organizational Productivity in Sri Lanka

Organization: UTA Manpower Service

Course: General Management & Labour Migration

Submission Date: April 2025

PART I: Addressing Challenges of Migration Labour Administration Process in Sri Lanka

Labour migration significantly contributes to Sri Lanka's economy through foreign remittances. Private recruitment agencies play a critical role in managing recruitment, documentation, training, and coordination with regulatory authorities such as SLBFE. However, several administrative challenges persist.

1. Delays in Documentation and Approvals:

Delays in passports, visas, and SLBFE approvals cause missed deployment deadlines.

Solution: Introduce centralized digital documentation systems and dedicated case officers.

2. Weak Stakeholder Coordination:

Poor communication among agencies, embassies, and institutions results in inefficiencies.

Solution: Implement integrated digital coordination platforms.

3. Inadequate Pre-Departure Training:

Workers lack cultural and legal awareness.

Solution: Enhance training programs with digital tools, financial literacy, and rights education.

4. Exploitation by Informal Sub-Agents:

Unlicensed brokers damage ethical recruitment practices.

Solution: Create a regulated national registry and verification platform.

5. Limited Digital Transformation:

Manual systems increase costs and errors.

Solution: Adopt cloud-based Recruitment Management Systems (RMS) and CRM tools.

Addressing these issues through digital transformation and structured management practices will improve migration governance and worker protection.

PART II: Project Proposal to Enhance Productivity at UTA Manpower Service

Executive Summary:

This proposal outlines a digital transformation strategy to enhance productivity and business performance at UTA Manpower Service.

Objectives:

- Reduce recruitment cycle time by 30%
- Increase placement success rate by 25%
- Improve client satisfaction by 20%
- Digitize 80% of documentation processes

Key Initiatives:

1. Digital Recruitment Management System:

Automated candidate screening, digital documentation, client portals, and mobile access.

2. Enhanced Training Programs:

Language orientation, workplace etiquette, financial literacy, and legal awareness.

3. Customer Relationship Management (CRM):

Client tracking, performance analytics, automated follow-ups, and business intelligence.

4. Digital Marketing Strategy:

Website redesign, SEO optimization, social media campaigns, and virtual recruitment fairs.

5. Staff Capacity Building:

Training in digital tools, advanced recruitment, ethical practices, and communication.

Implementation will occur in three phases over 12 months with a total estimated budget of LKR 690,000. Key performance indicators will measure recruitment time, placement rates, client satisfaction, and productivity.

This strategy positions UTA Manpower Service as a technologically advanced and ethically responsible leader in Sri Lanka's foreign employment sector.
